Summary

Full Stack Developer with 3+ years of experience building scalable SaaS and AI-powered web applications using React, Next.js, Node.js, Express, PostgreSQL, and Hasura. Experienced in owning end-to-end feature development, system design participation, API architecture, authentication systems, cloud deployments, and observability using Datadog, AWS, and GCP. Hands-on experience building AI-integrated products, healthcare interoperability (FHIR), and production-grade monitoring systems.

Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Hasura, JWT Authentication, Socket.io

Databases: PostgreSQL, MongoDB

Cloud & Infrastructure: AWS (EC2, SES), GCP (Cloud Run, Cloud Functions/Triggers), Nginx

Observability & Monitoring: Datadog (RUM, Logs, Dashboards), GCP Logging, Performance Monitoring

AI Developer Tooling: Claude Code, MCP, GPT-assisted debugging & development workflows

Version Control / Workflow: Git, GitHub, Bitbucket, Agile/Scrum

Experience

Full Stack Developer - Thinkhat

February 2023 - Present | Hyderabad, Telangana

- Designed and delivered end-to-end product features for the **SOCRATIC AI platform** using **React**, **Node.js**, **Hasura**, and **Redux**.
- Built a **user feedback and analytics system** to capture response quality insights, enabling data-informed improvements to AI product behavior.
- Achieved **99% application uptime** and reduced mean time to resolution by **40%** through proactive monitoring using **Datadog RUM, logs, and dashboards**.
- Integrated **FHIR-compliant APIs** and frontend workflows to support healthcare interoperability requirements.
- Built and optimized **responsive dashboard interfaces** for content management and operational workflows across devices.
- Implemented **JWT-based authentication and authorization** across frontend routes and backend APIs for secure access control.
- Collaborated in feature architecture discussions focused on scalability and maintainability.

Personal Project

Codrly | github.com/deepakjoshi-dj/Codrly

- Built a full-stack developer networking platform using **React**, **Node.js**, **Express**, and **MongoDB** with authentication and real-time communication features.
- Implemented **Socket.io-based real-time chat** with reconnection handling and message persistence for reliable communication.
- Deployed backend services on **AWS EC2**, configured **Nginx** as a reverse proxy, and integrated **Amazon SES** for transactional email delivery.

Education

Chandigarh University

Master of Computer Applications (MCA)

Jul 2024 - 2026

CGPA: 8.90

Indira Gandhi National Tribal University

Bachelor of Vocation (B.Voc) in Software Development

Jul 2017 - Jun 2020

CGPA: 7.50
